Published
Peer-approved article in international proceedings (Brazil–Czechia), with open data

1,200 trials
LLM security experiment across 20 languages, run entirely on CPU

4 systems
Shipped backends and local-AI products, from first commit to delivery

PROFILE

Backend developer and Computer Science student who builds Python APIs and AI systems that run locally, without cloud dependency. Author of published research on the security of retrieval-augmented generation, released with open code and data.

EXPERIENCE

Undergraduate Research Fellow — Sep 2026 — present
Universidade La Salle · RS Talentos Programme
Canoas, RS

- Scientific and technological research fellow on the project "Innovation Ecosystem and Technological Advancement in Climate Resilience and Health".

INCBAC · Institute of Czech-Brazilian Academic Cooperation
Remote · Czechia

Research & Development Scientist — Jun — Nov 2026

- Designed and ran a 1,200-trial experiment on prompt injection in offline RAG, across 20 languages, 7 writing systems and 3 open-weight models, entirely on CPU.
- Published the article in the UNIGOU Proceedings and released the full replication package openly.

Researcher — May — Nov 2026

- Selected for the academic collaboration track of UNIGOU Remote 2026, in joint research with Czech academia.

AI Manager / Junior Developer — Jan — Apr 2026
Carmillion
São Leopoldo, RS

- Customised AI assistants to each client's use case.
- Managed CRM operations and direct client support.

Web Developer — Feb 2022 — Mar 2024
Magic Games
Canoas, RS

- Built and maintained the company website.
- Repaired and maintained electronic toys and equipment.

PROJECTS

Lumi — AI desktop assistant robot
An assistant whose "mind" moves between a physical robot and a window on the PC by voice. FastAPI + WebSocket server, local LLM with offline fallback, ESP32, 3D-printed shell.

THPTBR — Offline Portuguese ↔ Haitian Creole translator
Runs with no internet, for the digital inclusion of Haitian immigrants. Custom RAG architecture over 7,000+ real sentences, ChromaDB and Llama 3 locally.

AURA — Local RAG over corporate documents
Chat over internal PDFs, CSVs and TXTs with a local LLM and no cloud dependency. LangChain, ChromaDB and Streamlit.

SIGIT — SaaS for technical service providers
Team project; stack chosen from scratch: React, FastAPI, PostgreSQL and JWT.

PUBLICATION

Does Language Resource Level Change Prompt Injection Success in Offline RAG?
UNIGOU Proceedings — INCBAC, 2026
doi.org/10.5281/zenodo.22861168
Dataset: apollowmm/ragsec-prompt-injection

SKILLS

BACKEND
Python · FastAPI · SQLAlchemy · REST APIs · JWT · Node.js · Java · .NET

DATA
PostgreSQL · MySQL · SQLite · ChromaDB · pgvector

AI
RAG · LLM security · Llama 3 / Ollama · LangChain · Whisper · NLLB

FRONT & TOOLS
React · Next.js · AWS · Git / GitHub

EDUCATION

2026 — 2029
BSc in Computer Science
Universidade La Salle, Canoas

2026 — 2028
Technologist in Systems Analysis & Development
Centro Universitário UniFatecie

2025 — 2026
ICT Residency
BRISA / Ulbra

2026
UNIGOU Scientific Training · 140 h
INCBAC

2026
AWS Academy — Cloud Foundations
Amazon Web Services
